Phono Pre-amplifier Kit for Beogram* Turntables

Thank you for purchasing a Sounds Heavenly pre-amplifier kit for your Beogram* Turntable. This high-quality kit will allow you to connect a Bang and Olufsen record player made before 1990 (ie. those without a built-in amplifier) or other brand of turntable directly into your modern or classic Bang and Olufsen or non-B&O audio system. This kit is suitable for home or professional use and is designed to be left permanently connected to the mains power supply.

This kit comprises:-

- A boxed Phono Pre-Amp with EU 240 volt AC mains Power Supply
- A mains plug adapter (for buyers outside mainland Europe)
- A 1 metre 7-pin Female DIN socket to twin RCA input cable
- A 1 metre twin RCA to 5-pin DIN or twin RCA plug output cable
- This instruction sheet

Fitting Instructions:-

1. Locate the fitted output cable on your turntable. This will have either twin RCA plugs, or a 5 pin or 7pin DIN plug. If RCA plugs are fitted, connect the plugs on the record player cable to the correct socket on the "IN" side of the Phono Pre-amplifier box (connect the plug with red markings to the red socket and the white plug to the white socket). Please ensure that the plugs are pushed FIRMLY into place. If a DIN plug is fitted, connect this to the supplied input cable with the 7 pin DIN line socket fitted and plug the other end of this cable into the input of the pre-amp as outlined above. Set the Mic/Phono switch on the pre-amp to "Phono".
2. Identify the output cable supplied with the kit (an RCA to DIN cable is supplied as standard, but this can be exchanged for an RCA to RCA cable if required). Connect the two RCA plugs on the cable to the "OUT" side of the pre-amp (again, connect red to red and white to white). Connect the other end of this cable to the "Aux In" or "Tape" socket on your audio system (the 5 pin DIN plug will fit either 5-pin or 7-pin DIN sockets).
3. For use in Europe, the pre-amp will have a 2 pin EU mains plug fitted. For customers in other countries, a suitable adapter plug will be fitted for the country of use. Plug the Power Supply into a suitable mains outlet and switch on the power supply.
4. Turn on your audio system and select the "Aux In" or "Tape" input.
5. Put on a record and enjoy the music!

* Beogram is a trademark of Bang and Olufsen. This Phono Pre-amplifier Kit is compatible with Beogram products as indicated by the use of the word Beogram above.
